

Project Development Phase Model Performance Test

| | |
|---------------|-------------------------------------------------------------------------|
| Date | 19 November 2022 |
| Team ID | PNT2022TMID25912 |
| Project Name | Visualizing and predicting heart disease with an interactive dashboard. |
| Maximum Marks | 10 Marks |

Model Performance Testing:

The project team shall fill in the following information in the model performance testing template.

| S.No. | Parameter | Screenshot / Values |
|-------|---------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. | Dashboard design | No of Visualizations / Graphs - 6 |
| 2. | Data Responsiveness | People experiencing the chest pain <ul style="list-style-type: none"> • Average BP during the chest pain • Maximum heart rate during the chest pain • BP along with age • Cholesterol by age and gender |
| 3. | Amount Data to Rendered (DB2 Metrics) | The dataset is trained and visualized using Cognos and it is connected to the IBM cloud. |
| 4. | Utilization of Data Filters | Visualizations are utilized in order to filter the data. |
| 5. | Effective User Story | No of Scene Added - 6 |
| 6. | Descriptive Reports | No of Visualizations / Graphs - 6 |
